The financial crisis was the catalyst for disappointing total returns for PERS in fiscal year 2009. But it was one of our best years in terms of competitive returns versus our peers as the Retirement Board skillfully navigated one of the most challenging investment markets in a generation.

PERS’ investment philosophy centers on maintaining diversified exposure to the global capital markets and systematically buying assets low and selling them high. To implement this strategy, we emphasize a simple, low cost structure that relies primarily on asset allocation and rebalancing.

This traditional, high quality philosophy was the key to our relative success in fiscal year 2009. PERS ended the fiscal year with $18.7 billion in assets, and a one year return of -15.8%. This return ranks in the top 20% among other large public pension funds.

PERS was able to outperform in this volatile market environment due to the Board’s disciplined rebalancing policy. PERS bought U.S. and non U.S. stocks as the markets dropped, positioning the fund to profit during the recent rally. In total, rebalancing generated more than $115 million in additional profits this fiscal year and positioned the fund to capitalize on a future economic recovery.

PERS’ long term returns have met the plan’s funding needs by generating a 25 year average annual return of 9%. PERS continues to be one of the lowest risk state pension plans for long term periods, while ranking in the top 15% in terms of risk/return efficiency.

It is critical to adhere to sound investment principles during volatile times. The Board’s unwavering commitment to its common sense investment philosophy and disciplined implementation of its long term investment strategy will be critical to PERS’ future success.
